# Customer Shopper Stories

As a shopper, I want to be to view all products, so that I can decide what I want to buy.

Users can use the links in the navigation bar and be redirected the products page. The All Products link with show every product within the store. The other links will filter products via category.

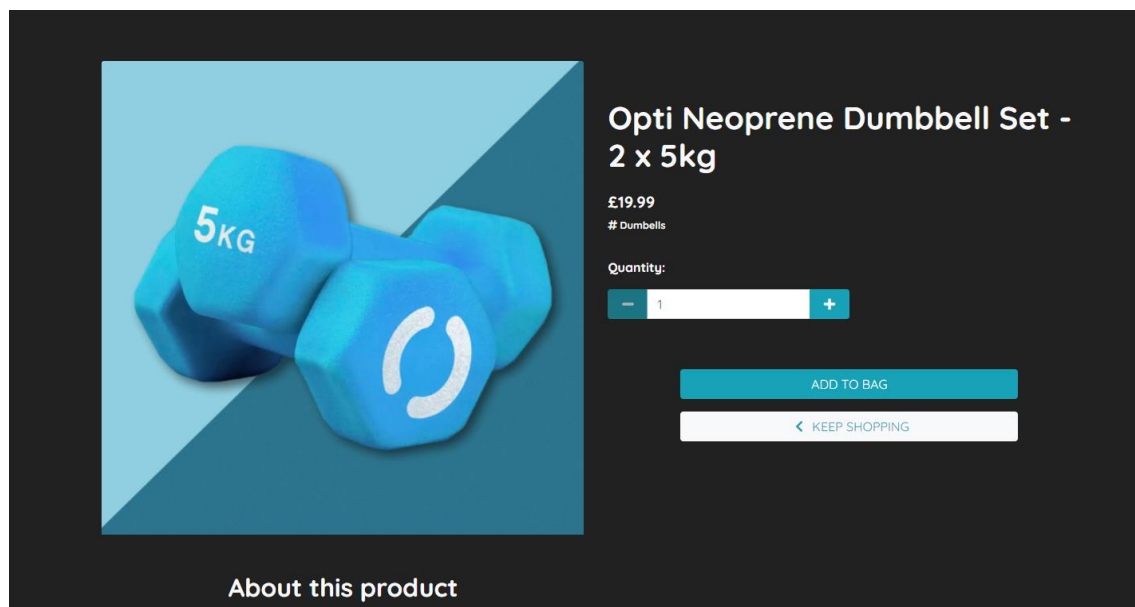

The Products page will show user all the products within the store, sorted by the sku in ascending order.

As a shopper, I want to be able to view products in more detail.

Users can hover over the product image to find to their cursor icons change to a pointer.
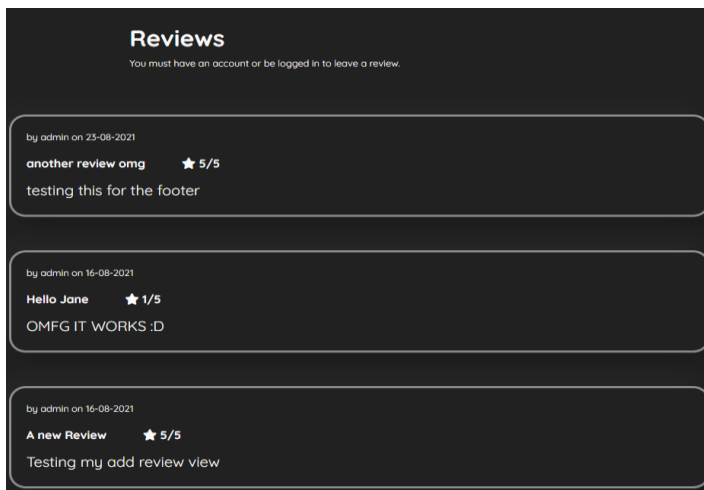

The products image is an anchor tag that redirects the user to the products detail page, allowing them to view the product description, add the item to their bag and adjust the quantity of them item they would like.

As a shopper, I want to be able to view reviews left by other customers for products, so that I can understand whether the product is worth purchasing.

At the bottom of the products detail page, User can view the review left for the products.

If reviews are left for the products, a simple message is there to notify users there no reviews for the product.

As a shopper, I want to be able to see a confirmation when a product is added to my shopping bag, so that I can avoid accidentally adding multiple quantities of the same item.

User who adds a product to their shopping bag will receive a notification in the form of a Bootstrap toast to update them of the current content. of the bag.

Users can see the current quantity of the item, product name and image.

As a shopper, I want to be able to view my bag, so that I can see what is in my bag and adjust quantities.

Users have 2 methods to reach the shopping bag page, which shows the items in the shopping bag, quantities, total value of the items and the grand total.

Method 1 – Users can click the link in the toast when they add an item to their bag.

Method 2 – User can click the link in the navigations bar to redirect them to the shopping bag page.
